

Launch of new website

The ICT4Peace Foundation is pleased to announce the launch of its redesigned website, <http://www.ict4peace.org>.

The ICT4Peace Foundation was established in 2005 to raise awareness specifically about Paragraph 36 of the WSIS Tunis Commitment and promote its practical realisation in all stages of crisis management. Paragraph 36 notes,

“We value the potential of ICTs to promote peace and to prevent conflict which, inter alia, negatively affects achieving development goals. ICTs can be used for identifying conflict situations through early-warning systems preventing conflicts, promoting their peaceful resolution, supporting humanitarian action, including protection of civilians in armed conflicts, facilitating peacekeeping missions, and assisting post conflict peace-building and reconstruction.”

Accordingly, the Foundation looks at the role of ICT covering aspects of early warning and conflict prevention, peace mediation, peacekeeping, peacebuilding as well as disaster management and humanitarian operations of the international community.
